

◆AIST International Imaging Workshops:

Features:

1. Training of young talents in the field of bioimaging
2. Intensive one-week program including lectures in the mornings followed by hands-on microscope training in the afternoons
3. Small working groups and personal attention
4. Comfortable stay at the AIST guest house
5. Participants' presentation & selection of the best three for awards
6. A tour to Olympus, Carl Zeiss showrooms and Leica Microsystems Experience Lab in Tokyo

First
Jan 19-25, 2014

Second
Dec 9-14, 2014

Trainees comments:

- ◆ The training was a great experience technically as well as conceptually.
- ◆ Besides the world-class technologies in AIST, they were also moved with Japanese hospitality and hard work.
- ◆ The workshop was so enjoyable that they have changed their concept of doing science and hope to spread the positivity, excitement to their colleagues and respective home institutions.
