

標準物質に関する ISO Guide 34 の活用促進の文書 (JCRB)

CIPM MRA の技術的要求事項を満たすためには、ISO/IEC 17025 に相当する要件が基本とされているが、標準物質に関する分野では、これに加えて ISO Guide 34 を活用することが妥当とする見解が JCRB の議長から文書で正式に表明された。これにより、今後の標準物質関連の CMC(Calibration and Measurement Capability)登録に際しては、ISO Guide 34 を効果的に導入することが推奨される。 [下記参照]

+++++  
IMPLEMENTATION OF ISO GUIDE 34 IN RELATION TO THE CIPM MRA FOR  
REFERENCE MATERIAL PRODUCTION AND CERTIFICATION

In order to comply with paragraph 7.3 of the CIPM MRA in those cases in which ISO/IEC 17025 is not sufficient, additional standards are required. The production and certification of reference materials is a clear case in point and, in this field, ISO Guide 34 is generally accepted as being the appropriate standard. NMIs or DIs which in addition to ISO/IEC 17025 also need to comply with this standard are not expected to work to the same timescale as that set by the JCRB for completion of quality system reviews based on ISO/IEC 17025 by their relevant Regional Metrology Organisations. The JCRB agreed that Guide 34 compliant systems should be in place by the end of 2005 and that RMOs should have completed their reviews of them by the first JCRB of 2006. If NMIs or DIs do not comply with this deadline, then any CMCs they have in the KCDB on a provisional basis will be removed.

A J Wallard  
JCRB Chairman  
21 February 2005

+++++  
Dear Colleagues,

Please find the attached note from the JCRB Chairman concerning the implementation of ISO Guide 34 for reference materials producers and certifiers.

I would appreciate your informing your member NMIs that chemistry CMCs should not be included in the lists of CMCs to be deleted from the KCDB that RMOs will submit at the upcoming JCRB meeting in Minsk.

Best regards,

Ismael
