

Renewal of MOU between NIM and NMIJ

On March 24, 2025, the Memorandum of Understanding (MOU) between the National Institute of Metrology of China (NIM China) and the National Metrology Institute of Japan (NMIJ) was renewed.

For 15 years, NMIJ has been working with NIM China under an MOU initially signed in 2010.

The renewed MOU continues this collaboration, focusing on activities such as international comparisons and the exchange of young researchers.

This renewal is expected to strengthen the presence of both institutes in the CIPM and APMP activities, as well as to accelerate the development of the entire field of measurement and metrology.
