

# Delegation Visit from NPL and NPNT0, United Kingdom, to NMIJ

On December 4, 2024, delegates from the National Physical Laboratory (NPL, UK) and the National Positioning, Navigation and Timing Office (NPNT0, UK) visited NMIJ. The delegates from NPL included Dr. Leon Lobo (Head of the National Timing Centre) and four other personnel, while the delegates from NPNT0 included Mr. Michael Pigott (Deputy Head) and two other personnel. Three laboratories working on the time and frequency metrology hosted these delegates during their visit. Active conversations between the delegates and hosting laboratory researchers during laboratory visits have opened up fruitful opportunities for future collaboration.
