

The 5th Japan-China-Korea MEMS/NEMS with NANO KOREA 2014

July 3, 2014 | Coex, Seoul, Korea

Welcome to JCK MEMS/NEMS 2014

We would like to invite you to the 5th JCK MEMS/NEMS 2014, which will be held at Coex, Seoul, Korea on July 3, 2014. The JCK MEMS/NEMS conference is to provide an annual East Asian forum for the recent progress in Green & Life Innovation by MEMS/NEMS technology.

The 1st JCK MEMS/NEMS Conference was held at Sapporo, Japan in 2010, chaired by Prof. Renshi Sawada from Kyushu University. The 2nd Conference was held at Jeju Island, Korea in 2011, chaired by Dr. Nak-Kyu Lee from Korea Institute of Industrial Technology (KITECH), the 3rd Conference was held at Shanghai, China in 2012, chaired by Dr. Xinxin Li from Shanghai Institute of Microsystem and Information Technology (CAS). The 4th Conference was held at Sendai, Japan in 2013, chaired by Prof. Eiji Higurashi from The University of Tokyo.

Now this year, the torch has been relayed to Korea once again. Especially, this year it will be held with NANO KOREA 2014 that is the biggest nanotechnology festival in Korea. The 5th JCK MEMS/NEMS with NANO KOREA 2014 will provide you a great platform for sharing the most recent achievements and planning strategic collaboration for Green & Life Innovation and Industrial Convergence of MEMS/NEMS and nanotechnology development in Asia.

We are looking forward to an exciting and high-level scientific program that will give the opportunity to all delegates for networking and sharing ideas, while enjoying the wonderful experience in Seoul.
